Pearson's r (Correlation Coefficient) = 0.6953

The linear regression equation is:

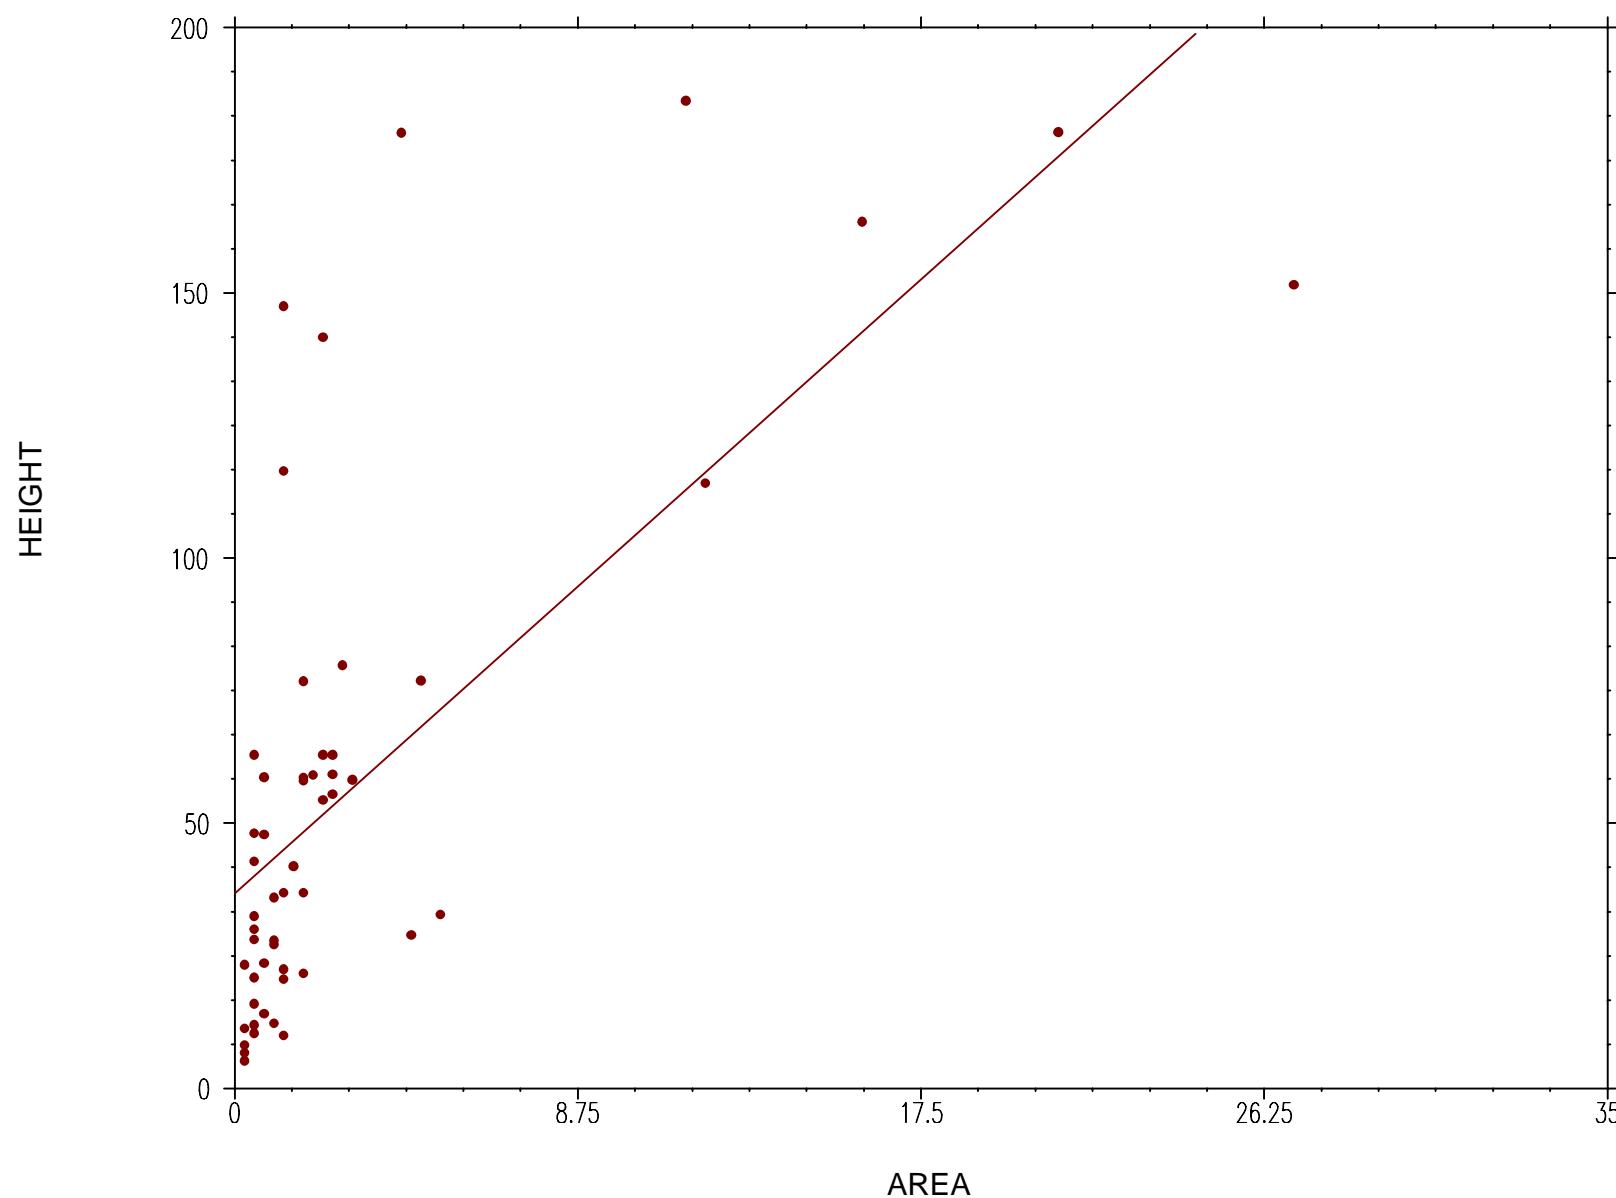

$$\text{HEIGHT} = 36.76158 + 6.614356 * \text{AREA}$$

Test of hypothesis to determine significance of relationship:

H(null): Slope = 0 or H(null): r = 0 (two-tailed test)
t = 6.91 with 51 degrees of freedom p <= .001

Note: A low p-value implies that the slope does not = 0.
